Consultation Fee	PKR 2,500 (credited toward procedure)
Procedures Done	1,600+
Rating	4.7/5 (290 reviews)

4. Procedures & Pricing

4.1 Surgical Hair Transplant Procedures

Procedure	Description	Price Range (PKR)	Duration	Recovery
FUE (Follicular Unit Extraction)	Individual follicles extracted & implanted. No linear scar. Most popular method.	80,000 – 350,000	6–10 hours	7–10 days
FUT (Follicular Unit Transplantation)	Strip of scalp harvested. Higher graft yield. Ideal for mega sessions.	70,000 – 280,000	4–8 hours	10–14 days
DHI (Direct Hair Implantation)	Choi pen implantation. Higher density & precision. No shaving required.	150,000 – 500,000	8–12 hours	5–7 days
Sapphire FUE	FUE using sapphire blades for smaller channels & faster healing.	120,000 – 420,000	7–10 hours	5–8 days

Robotic FUE	AI-assisted robotic extraction for maximum precision.	250,000 – 600,000	5–8 hours	5–7 days

Pricing is per session and based on graft count. Final price confirmed after free scalp assessment.

4.2 Pricing by Graft Count (FUE Standard)

Graft Range	Price per Graft (PKR)	Estimated Total (PKR)	Suitable For
500 – 1,000 grafts	95	47,500 – 95,000	Hairline refinement, minor thinning
1,001 – 2,000 grafts	90	90,090 – 180,000	Moderate baldness (Norwood 3-4)
2,001 – 3,000 grafts	85	170,085 – 255,000	Advanced thinning (Norwood 4-5)
3,001 – 4,000 grafts	80	240,080 – 320,000	Extensive baldness (Norwood 5-6)
4,001 – 5,000 grafts	75	300,075 – 375,000	Mega session (Norwood 6-7)
5,000+ grafts	70	350,000+	Full scalp restoration

4.3 Specialized Transplant Areas

Area	Technique	Price Range (PKR)	Sessions Required
Beard Transplant	DHI / FUE	100,000 – 250,000	1 session
Mustache Transplant	DHI	60,000 – 120,000	1 session
Eyebrow Transplant	DHI	80,000 – 160,000	1 session
Eyelash Transplant	DHI	90,000 – 180,000	1–2 sessions
Scar Repair (Scalp)	FUE / DHI	70,000 – 200,000	1–2 sessions
Crown Restoration	FUE / Sapphire	80,000 – 220,000	1 session
Hairline Design & Restoration	FUE / DHI	90,000 – 250,000	1 session

4.4 Non-Surgical Treatments

Treatment	Description	Price per Session (PKR)	Recommended Sessions
PRP (Platelet Rich Plasma)	Growth factors from own blood injected to stimulate follicles.	15,000 – 25,000	6–8 sessions (monthly)
Mesotherapy	Vitamins, minerals & amino acids injected into scalp.	12,000 – 18,000	8–10 sessions (fortnightly)
Low Level Laser Therapy (LLLT)	FDA-approved laser to stimulate follicle activity.	8,000 – 12,000	12–20 sessions (weekly)
GFC (Growth Factor Concentrate)	Advanced PRP with concentrated growth factors.	20,000 – 35,000	4–6 sessions (monthly)
Scalp Micropigmentation (SMP)	Tattooing technique mimicking hair follicles.	50,000 – 150,000	2–4 sessions
Topical Minoxidil Therapy	Medical-grade minoxidil application + monitoring.	5,000 – 8,000	Ongoing (monthly review)
DHT Blocker Injections	Finasteride injections to prevent further hair loss.	10,000 – 15,000	4–6 sessions (bimonthly)
Stem Cell Therapy	Stem cells injected to regenerate dormant follicles.	40,000 – 80,000	2–3 sessions (quarterly)

4.5 Package Deals

Package Name	Includes	Regular Price (PKR)	Package Price (PKR)	Savings
Starter Package	Free consultation + 500 grafts FUE + 1 PRP session	90,000	72,000	20%

Non-Surgical 6-Month Plan	6 PRP + 6 LLLT + scalp analysis + medications	200,000	140,000	30%
VIP Mega Session	5000+ grafts Sapphire FUE + 6 GFC + hotel stay 2 nights	650,000	490,000	25%

5. Consultation Process

5.1 Free Initial Assessment

Every new patient receives a free 30-minute initial scalp assessment that includes:

- Trichoscopic scalp analysis (magnified 200x)
- Norwood Scale classification for men / Ludwig Scale for women
- Donor area density measurement
- Hair loss cause diagnosis (genetic, hormonal, nutritional, stress)
- Personalized treatment roadmap
- Graft count estimation and cost projection

5.2 Consultation Booking

Method	Details	Response Time
Online Form	www.hairreviveclinic.com/book	Within 2 hours
WhatsApp	+92-300-4247349	Within 30 minutes (8 AM – 9 PM)
Phone Call	+92-42-3578-9900	Immediate during business hours
Walk-in	Available at all branches	Same day (subject to availability)
Email	appointments@hairreviveclinic.com	Within 24 hours

6. Pre & Post Procedure Guidelines

6.1 Pre-Procedure Instructions (7 Days Before)

- Stop blood thinners (aspirin, ibuprofen) — consult your prescribing doctor first
- Avoid alcohol for 7 days before surgery
- Stop smoking for at least 2 weeks before the procedure
- Do not apply any hair products (oils, gels, sprays) on the day of surgery
- Eat a light meal 2 hours before the procedure
- Wear loose, comfortable clothing with a button-front shirt (not pullover)
- Arrange for someone to drive you home post-surgery
- Inform us of all medications and supplements you are taking

6.2 Post-Procedure Care (First 2 Weeks)

Day	Care Instructions

Day 1–3	Keep transplanted area dry. Sleep with head elevated at 45°. Take prescribed antibiotics and pain relief.
Day 4–7	Gentle saline sprays on transplanted area. First wash with provided medicated shampoo on Day 4.
Day 7–10	Scabs begin to fall off naturally — do NOT pick or scratch. Regular gentle washing allowed.
Day 10–14	Most scabs gone. Hair in transplanted area may shed — this is NORMAL (shock loss phase).
Week 3–6	Shock loss peak. Continue medications. Avoid direct sun exposure.
Month 3–4	New hair growth begins. Thin and light at first.
Month 6–9	Significant growth visible. Texture and thickness improving.
Month 12–18	Final results fully visible. 90%+ density achieved.

6.3 What to Avoid After Surgery

- Swimming pools, sea, or steam rooms for 4 weeks
- Strenuous exercise or heavy lifting for 2 weeks
- Direct sunlight on scalp for 6 weeks (use a hat)
- Scratching or rubbing the transplanted area
- Hair dye or chemical treatments for 3 months
- Alcohol for 2 weeks post-surgery

7. Hair Loss Education & FAQs

7.1 Types of Hair Loss We Treat

Condition	Description	Recommended Treatment
Androgenetic Alopecia (Male Pattern)	Genetic DHT-induced hair loss. Most common in men.	FUE / DHI + Medications
Androgenetic Alopecia (Female Pattern)	Diffuse thinning especially on crown. Affects women.	DHI + PRP + Minoxidil
Alopecia Areata	Patchy hair loss due to autoimmune response.	PRP + Mesotherapy + Steroids
Traction Alopecia	Hair loss due to constant pulling (tight hairstyles).	FUE after stabilization
Scarring Alopecia	Permanent hair loss due to scars/burns.	Scar Repair FUE
Telogen Effluvium	Sudden shedding due to stress, illness, or hormones.	PRP + Nutritional support

Nutritional Deficiency Alopecia	Hair loss due to iron, B12, D3 deficiency.	Mesotherapy + Diet plan
Post-chemotherapy Hair Loss	Hair loss following cancer treatment.	PRP + LLLT + Stem Cells

7.2 Norwood Scale (Men)

Stage	Description	Grafts Needed (Approx)
Stage 1	No visible hair loss. Slight recession possible.	Not needed
Stage 2	Slight recession at temples.	500–1000
Stage 3	Deeper temple recession. Early vertex thinning.	1000–2000
Stage 4	Defined bald spots at crown. Hairline further back.	2000–3000
Stage 5	Bridge between temple and crown hair loss forming.	3000–4000
Stage 6	Bridge gone. Large bald area visible.	4000–5000
Stage 7	Only a rim of hair remains on sides and back.	5000–7000

7.3 Frequently Asked Questions

Q: Is hair transplant permanent?

Yes. Transplanted hair follicles are taken from the DHT-resistant donor zone (back and sides of the scalp). These follicles retain their genetic resistance and continue to grow for a lifetime. However, the non-transplanted native hair may continue to thin, requiring future sessions or medications.

Q: At what age can I get a hair transplant?

The minimum recommended age is 25 years. This ensures hair loss has stabilized to a predictable pattern. There is no upper age limit — many patients in their 60s and 70s have successful procedures, provided they are in good health.

Q: Is the procedure painful?

The procedure is performed under local anesthesia. Patients experience mild discomfort during the anesthesia injection phase (approx. 10–15 minutes). After that, the area is numb and most patients watch movies or sleep during the procedure. Post-operative soreness is managed with prescribed pain medication.

Q: How long until I see results?

Hair growth follows this timeline: transplanted hair sheds in weeks 2–6 (normal shock loss), new growth begins at months 3–4, significant density visible at months 6–9, and final result achieved at 12–18 months.

Q: What is the success rate?

HairRevive Clinic reports a 97% graft survival rate for FUE procedures and 98.2% for DHI. Success depends on surgeon skill, patient's donor density, and post-operative care compliance.

Q: Can women get hair transplants?

Yes. Women with female pattern baldness, traction alopecia, or scarring alopecia are excellent candidates. Dr. Ayesha Karim and Dr. Sana Mirza specialize in female hair restoration. The DHI technique is preferred for women as it does not require complete head shaving.

Q: What is the difference between FUE and DHI?

In FUE, channels are created first, then grafts are implanted. In DHI, a special Choi implanter pen is used to simultaneously create the channel and implant the graft in one step. DHI offers higher density and directional control but takes longer and is more expensive.

Q: How many sessions will I need?

Most patients require 1–2 sessions. A single session covers 1,000–5,000+ grafts. Patients with very extensive baldness (Norwood 6–7) or those desiring maximum density may opt for a second session 12–18 months after the first.

8. Payment & Financing Options

8.1 Accepted Payment Methods

Method	Details	Processing Fee
Cash (PKR)	Accepted at all branches	None
Bank Transfer	Account details provided at clinic	None
Credit Card (Visa/Mastercard)	Available at all branches	2% surcharge
Debit Card	Available at all branches	None
EasyPaisa / JazzCash	Mobile wallet payments accepted	None
Cheque	Bank-guaranteed cheques only	None
USD / AED	For international patients	As per daily PKR rate

8.2 Installment Plans

Plan	Down Payment	Monthly Installments	Interest	Eligibility
3-Month Plan	50% down	2 equal monthly payments	0%	All patients
6-Month Plan	30% down	5 equal monthly payments	0%	Procedures above PKR 150,000
12-Month Plan	20% down	11 equal monthly payments	8% annually	Procedures above PKR 250,000
Bank EMI (HBL/Meezan)	As per bank	3–24 months	As per bank rate	Credit card holders

Note: Consultation fee is fully credited toward procedure cost if booked within 30 days.

9. International Patient Services

9.1 Why International Patients Choose HairRevive

- Cost savings of 60–80% compared to UK, USA, UAE, and Europe
- International-standard sterile operating theaters (ISO-certified)
- Surgeons trained in Turkey, UK, and South Korea
- English-speaking staff and coordinators
- Full travel & accommodation assistance

9.2 International Package Inclusions

Service	Included?	Details
Airport Pick & Drop	Yes (VIP Package)	Lahore, Karachi, Islamabad airports
Hotel Stay	Yes (2–4 nights)	3-star or 5-star options available
Pre-op blood tests	Yes	Done on arrival day
Procedure	Yes	As per confirmed plan
Aftercare Kit	Yes	Shampoo, serum, medications for 1 month
Post-op Check	Yes	Day 1 and Day 5 check-ups
Online Follow-up (6 months)	Yes	Monthly video consultations
24/7 WhatsApp Support	Yes	Dedicated international coordinator

9.3 Price Comparison (2000 Grafts FUE)

Country	Average Cost (USD)	HairRevive (USD equiv.)	Savings
United Kingdom	$8,000 – $15,000	$900 – $1,200	~85%
United States	$10,000 – $20,000	$900 – $1,200	~88%
UAE (Dubai)	$6,000 – $12,000	$900 – $1,200	~80%
Turkey (Istanbul)	$2,500 – $5,000	$900 – $1,200	~60%
India	$2,000 – $4,000	$900 – $1,200	~55%

10. Aftercare Products & Medications

Product	Purpose	Price (PKR)	Available At
HairRevive Growth Serum	Stimulates follicle activity post-transplant	3,500/bottle	Clinic + Online
Medicated Anti-Shedding Shampoo	Gentle cleansing during recovery	1,200/bottle	Clinic + Online
Minoxidil 5% Solution	Prevents further loss, supports new growth	2,500/month	Clinic
Minoxidil 5% Foam	Foam version for easier application	3,000/month	Clinic + Online

Biotin 10,000mcg Supplements	Hair strengthening from within	900/month	Clinic + Online
Scalp SPF 50 Sunscreen Spray	Protects scalp post-surgery	2,200/bottle	Clinic
Recovery Saline Spray	Hydration and healing of transplanted area	800/bottle	Clinic
PRP Home Maintenance Kit	At-home scalp roller + serum combo	5,500/kit	Clinic + Online

11. Patient Testimonials

Patient	Location	Procedure	Review
Ahmed K. (32)	Lahore	2500 grafts FUE	Absolutely life-changing. Dr. Usman's skill is incredible. 14 months out and my hair looks completely natural. Worth every penny.

Sarah M. (28)	Karachi	DHI + PRP x6	As a woman I was nervous but Dr. Sana made me feel so comfortable. My crown area has filled in beautifully. The no-shave DHI was perfect for me.
James T. (45)	UK (International)	3000 grafts Sapphire FUE	Flew from Birmingham. Saved £12,000 compared to UK quotes. The VIP package made everything seamless. Dr. Ayesha is world-class.
Faisal R. (38)	Islamabad	Beard + Scalp Combo	Got both beard and hairline done in same session by Dr. Bilal. 8 months later the results are phenomenal. Highly recommend.
Tariq N. (51)	Karachi	4500 grafts FUE	Was Norwood 6. After 16 months I have hair again for the first time in 15 years. The team's aftercare support was outstanding.
